Personal Statement

Committed to mastering new technologies and refining my problem-solving and analytical abilities, I am pursuing a degree in software engineering. My academic journey is enriched by hands-on projects that enhance my technical expertise and ignite my creativity. Beyond academics, my active participation in leadership roles and team-based initiatives has cultivated resilience, teamwork, and adaptability. These qualities not only support my academic growth but also prepare me to address complex challenges collaboratively. I am eager to contribute meaningfully to the tech industry by combining my technical proficiency with a dedication to leadership and innovation.

Projects

- **Software Development Group Project (Ongoing) | Memo** **2024 - 2025**
Collaborated with a team to develop Memo, a new social media app targeting university students and alumni.
- **Life on land Group Project** **2024**
Worked with a team to develop "Life on Land," a website promoting Sustainable Development Goal 15, using HTML, CSS, and JavaScript.
- **Ticketing System (Coursework Project)** **2024**
implemented a simple ticketing system using React.js for the frontend and Node.js for the backend.
